General Use Garment Packaging

**Layered Packaging Design to Prevent Contamination from Entering Your Controlled Environment**

- Packaged in a primary bag, carton liner and outer corrugated carton to prevent cross contamination and contamination migration from one environment to another.
- All garments are precision folded and stacked within the primary bag to permit efficient storage with or without bins.
- Primary bag placed in clear carton liner that is twisted and taped closed.
- All open seams on shipping containers are tape-sealed for additional protection from possible contamination.
- Four-sided carton labeling allows easy product identification and inventory management.

**Packaging Components:**
