

Sterile Suites Garment Packaging

Maximize Control of Your Sterile Environment

- Outer carton has a Certificate of Irradiation/Compliance with irradiation indicator dot eliminating the need to quarantine product awaiting documentation. All open seams on the outer carton are tape sealed to further prevent contamination. Four-sided carton labeling allows easy identification and inventory management
- Twist-sealed carton liner has an additional Certificate of Irradiation/Compliance with irradiation indicator dot
- Tertiary and/or secondary bags are labeled with detailed product information for quick, easy identification
- Primary bags are labeled with product information and fully traceable lot number

Carton taped closed with corner labels and Certificate of Compliance
