

Alpha ProTech has you covered with a comprehensive line of non-woven weather resistive barriers.

**REX™ Fortis High-P** is the ideal option for demanding applications that require protection from severe weather conditions and environments. It is constructed of surfactant-resistant materials, making it suitable for use on wood, vinyl, metal, brick, stone, cement siding, stucco, or EIFS. With 360° drainage technology, it minimizes opportunities for installation issues while providing 55 perms. REX™ Fortis High-P is approved for single-family residences and commercial properties up to 4 stories. REX™ Fortis High-P offers a 25-Year Warranty, extendable to Limited Lifetime Warranty with our System Warranty for residential properties.

**REX™ Fortis Low-P** is the ideal option for demanding applications that require protection from severe weather conditions and environments. It is constructed of surfactant-resistant materials, making it suitable for use on wood, vinyl, metal, brick, stone, cement siding, stucco, or EIFS. With 360° drainage technology, it minimizes opportunities for installation issues while providing 15 perms. REX™ Fortis Low-P is approved for single-family residences and commercial properties up to 4 stories. REX™ Fortis High-P offers a 25-Year Warranty, extendable to Limited Lifetime Warranty with our System Warranty for residential properties.

**REX™ Fortis Commercial** delivers unmatched performance and protection for the demanding applications of 5+ story construction. Its surfactant-resistant construction makes it suitable for wood, vinyl, metal, brick, stone, cement siding, stucco, or EIFS. With 360° drainage technology, REX™ Fortis Commercial minimizes opportunities for installation issues while providing 35 perms.
